Supplier

Since launching the iconic MultiDrawer in 1958, Bisley has pioneered innovative storage and furniture that meets the challenges of the time while also remaining relevant, decade after decade. When it comes to creating working environments, Bisley is the name people turn to for quality they can trust.

“ Our goal is to create a forward thinking and future proofed office and our new furniture is really helping with the change to mobile working. Bisley has been very professional throughout, from advising which products would be most suitable to the slick installations.

Harrow Council

Bisley provides practical and attractive furniture no office can function without

However, it's not just our quality we're confident with - we can also supply in volume. We produce 15,000 items each week and in 2017 we delivered 99.1% of products without damage or fault. This is a result of our desire to be dependable and to build enduring relationships not just with customers but also our suppliers.

Our storage options can adapt to fit any organisation's needs

In our most recent consumer survey, 92% of our customers rated Bisley's service excellent or above average

BISLEY

www.bisley.com/publicsector

Our aim is to keep creating products that are as attractive as they are useful.

We are known as Europe's leading manufacturer of steel storage, however through our dedicated in-house design and manufacturing facilities we also produce and supply a wide range of office products - MFC desking, seating, steel/ wooden storage, accessories and accommodation furniture. This allows us to combine the strength and durability of steel with the pleasing aesthetic qualities across a wide range of modern wood & fabric based finishes.

Creating collaborative spaces that naturally bring people together

Our intention is to always make the right choices for the environment. For example, in order to make our production process as efficient as possible we have adopted Lean principles in our factories - resulting in less waste, less energy consumption and less impact on the environment. Our primary raw material, steel, is durable so has a long life span, and on average, 56% of the content of the steel in the European market is recycled. Plus, steel is up to 100% recyclable and it doesn't lose quality if repeatedly recycled.

Classrooms, cafeterias, university digs or residential accommodation – we manufacture and install furniture that meets unique requirements

Bisley's products enhance workspaces by providing intelligent, useful and often bespoke storage solutions which create organised environments. Whether that means furniture for focused and individual working, or adaptable pieces for agile or collaborative spaces, meeting rooms or break-out areas, our extensive portfolio helps people be comfortable and effective, wherever they are working.
